

Make your own: Spooky Skeleton!

What You Need: Black construction paper Plastic drinking straws Scissors Clear drying, non-toxic glue White chalk

What You Do:

1. Cut the straws into pieces of several sizes to represent the skeleton's bones. Make segments that range from an inch to a few inches long.
2. Ask your child to piece together a skeleton from the straws. Compare this to putting together a puzzle. If you wish, have her refer to a diagram of the body to make her model more accurate.
3. Your child can now gently lift each straw piece and place a line of glue underneath to hold.
4. Add a head "skull" by drawing one in with white chalk.
5. Set aside to dry.
